Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR Processing Notes for #37288

Stress in America, United States, 2007-2023

DS15: 2019-2023 Cumulative Dataset

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR recoded values in the variables **DMZIPUS**, **DMAGE**, and **Q270** in the data. **DMAGE** and **Q270** were top and bottom-coded. Valid responses in **DMZIPUS** have been replaced with "MASKED BY ICPSR".
2. **Variable Link:** The variable **YEAR** is the year-level linking variable for the cases in the data set.
3. **Non-Valid Responses:** Datasets 15 through 25 within this study contain the exact same 478 variables. This is due to the accumulation of all variables asked across the 2019-2023 surveys. With the exception of the 2019-2023 Cumulative Dataset (DS0015), each dataset will contain variables that were not asked for that year. As a result the vast majority of variables (250+) will not contain any valid responses. As a result this may or may not affect the remaining processing notes below.
4. **Variable Differences:**
 - a. Several variables that occur in the data are not in the Data Collection Instrument; no further information was provided.
 - b. There are slight differences with the variable names between the Data Collection Instrument and the dataset released by ICPSR; no further information was provided.
5. **Value Label Discrepancy:** The variable **Q270** has value labels which are not mutually exclusive. This discrepancy is due to **Q270** containing data from multiple years. The variable **YEAR** should be referenced when using **Q270**.
6. **Long Value Labels:** The variable **Q1557** contains value labels that are too long to properly display in the data and the ICPSR Codebook. The complete labels can be found in the Data Collection Instrument.
7. **Additional Information:** For additional information on the Stress in America Study, please visit the [Stress in America](#) website.

ICPSR 37288

Stress in America, United States, 2007-2023

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

2019-2023 Cumulative Dataset

RECORD: RECORD Record number

This variable has 33,135 valid cases out of 33,135 total cases.

- Mean: 3121.12
- Minimum: 1.00
- Maximum: 12233.00
- Standard Deviation: 2341.49

Location: 1-5 (width: 5; decimal: 0)

Variable Type: numeric

UUID: UUID Respondent identifier

This variable has 33,135 valid cases out of 33,135 total cases.

Location: 6-21 (width: 16; decimal: 0)

Variable Type: character

YEAR: Year of study

Value	Label	Unweighted Frequency	%
2019	-	3617	10.9%
2020	-	13471	40.7%
2021	-	6048	18.3%
2022	-	6204	18.7%
2023	-	3795	11.5%
	Total	33,135	100.0%

This variable has 33,135 valid cases out of 33,135 total cases.

Percentages for valid and missing data are based on 33,135 total cases.

- Mean: 2020.79
- Median: 2020.00
- Mode: 2020.00
- Minimum: 2019.00
- Maximum: 2023.00
- Standard Deviation: 1.20

Location: 22-25 (width: 4; decimal: 0)

Variable Type: numeric

STATUS: STATUS Respondent status

Value	Label	Unweighted Frequency	%
1	Terminated	0	0.0%
2	Overquota	0	0.0%

Value	Label	Unweighted Frequency	%
3	Qualified	33135	100.0%
4	Partial	0	0.0%
	Total	33,135	100.0%

This variable has 33,135 valid cases out of 33,135 total cases.

Percentages for valid and missing data are based on 33,135 total cases.

- Minimum: 3.00
- Maximum: 3.00

Location: 26-26 (width: 1; decimal: 0)

Variable Type: numeric

DMCNTRY: COUNTRY: In which country or region do you currently reside?

Value	Label	Unweighted Frequency	%
14	Australia	0	0.0%
33	Brazil	0	0.0%
42	Canada	0	0.0%
48	China	0	0.0%
